Mohamed Mounir

Staff Frontend Engineer

Address: Düsseldorf, Germany Phone: (+49) 152 3716 1606

Email: m.mounir.f@gmail.com Links: LinkedIn | Github

Staff Frontend Engineer with 10+ years of experience architecting scalable, high-performance web applications that drive business growth across global markets. Proven expertise in leading cross-functional initiatives, building foundational systems, and mentoring senior engineers. Passionate about aligning technical strategy with product goals to deliver exceptional user experiences.

Professional Experience

Staff Frontend Engineer Interloom

May 2025 - Oct 2025 Germany - Remote

- Resolved critical authentication issues in OIDC + PKCE flow, improving login reliability across Safari browsers and mobile platforms, preventing random logouts, and laying groundwork for a backend-for-frontend architecture. Reduced legacy codebase by 95% (2,000+ → 100 lines), significantly enhanced security and established a clean foundation for the new BFF.
- Built a custom markdown-to-ProseMirror extension for Tiptap, ensuring compliance requirements
 were met while eliminating reliance on costly enterprise licenses, saving significant operational
 expenses.
- Led development of a rich text editing platform with entity mentions, slash commands, and structured content management, improving user experience and content scalability for enterprise workflows.

Senior Frontend Engineer Lokalise

Nov 2021 - Apr 2025 Germany - Remote

- Led end-to-end development of major features including, Workflows, Al LQA, Review Center, and Comments, driving planning, documentation, execution, and delivery. Increased feature retention by 33% and contributed significantly to overall revenue growth.
- Partnered with UI/UX teams to design and implement reusable components in the <u>Louis design system</u>, improving scalability and consistency across the platform. Provided mentorship and technical guidance to frontend engineers and collaborated with backend developers to define system architecture and direction.
- **Directed cross-functional collaboration** between developers, stakeholders, designers, and QA engineers, ensuring efficient project planning, on-time delivery, and alignment with company goals. Recognized for **driving execution and accelerating feature release cycles**.

Senior Frontend Engineer Douglas

Jul 2020 - Nov 2021 Germany - Hybrid

- Led development of a <u>Live Shopping</u> feature during the pandemic, enabling customers to shop online during store closures and driving a 60% increase in e-commerce sales revenue.
- Oversaw international e-commerce platform development using a microservices architecture, delivering scalable solutions for multi-market expansion and improving platform reliability.
- Mentored and guided junior developers, fostering technical growth and ensuring best practices in frontend engineering through code reviews, knowledge sharing, and building reusable, unit-tested components.

METRO Markets GmbH Germany - Hybrid

- Owned development of the checkout process, optimizing cart-to-order flow, reducing cart
 abandonment, and delivering a frictionless payment experience for both B2B and B2C customers through
 VAT-inclusive/exclusive pricing and multiple secure payment gateway integrations.
- **Designed and launched an internal serverless CMS** (Firebase-based) with a drag-and-drop interface, empowering marketing teams to independently manage homepage promotions and SEO content. Reduced marketing-related backlog by **40**%, boosting productivity and time-to-market.
- Led storefront enhancements to improve product discovery and customer engagement, strengthening marketplace visibility and driving higher conversion rates.

Software Engineer

Nov 2013 - Apr 2019

Cloud4Rain - <u>Trufla</u> - <u>MOWEEX</u> - <u>Alfahologram</u>

Egypt - Hybrid

- Led full-stack development across diverse domains (e-commerce, insurance, energy, presentations), architecting solutions with Angular, React, and Node.js.
- Directed a cross-functional team at Cloud4Rain, defining technical strategy and securing a client project by architecting a <u>delivery-on-demand platform</u> that reduced projected costs by 40%.
- Built foundational tooling, such as an open-source Angular module for dynamic <u>JSON Schema-based</u> forms, saving hundreds of development hours.
- Pioneered innovative R&D projects, including a face gesture tracking library for <u>interactive charity</u> <u>applications</u> and <u>AR experiences</u> for real estate.

Education

BSc, Electrical Engineering, <u>Higher Technological Institute</u>, Egypt (2008 - 2015)

Skills

Technical Skills

- Languages: JavaScript, TypeScript
- Frontend Frameworks & Libraries: React, Angular, Next.js
- Mobile & Desktop: React Native, Ionic, Capacitor, Electron
- State Management: Redux (RTK), TanStack Query, RxJS
- Styling & UI: CSS3, SASS, CSS Modules, Tailwind CSS, Styled-Components, Material-UI (MUI), Mantine, Shadon/ui, Radix UI
- Routing: TanStack Router, React Router, Next.js Router
- Testing: Jest, Vitest, React Testing Library, Cypress, Playwright
- Build Tools & Monorepos: Vite, Webpack, Turborepo, Nx
- Backend & Runtime: Node.js, Express.js, Fastify
- Databases & ORMs: PostgreSQL, MySQL, NoSQL, MongoDB, Prisma
- APIs: GraphQL, RESTful APIs
- Cloud & Deployment: GCP, AWS, Azure, Cloudflare, Vercel, Netlify, Supabase
- Tools & Practices: Storybook, GitHub Actions, Docker

Professional Skills

 Technical Leadership • Frontend Architecture • Cross-Functional Collaboration • Mentoring • Project Planning • Design Systems • Performance Optimization • Web Accessibility (a11y)
